

## Lady Green's Educational & Incentive Programs

Luki

LGR's *Kids* educational program was created to help pave the way for our future. Offering customized programs for schools of all grade levels, LGR finds ways to make recycling participation fun and effective for students, faculty and staff. LGR incorporates characters that kids can relate to which are based on real life depictions of Michelle, the founder, and her furry and feathery family members. Through interactive participation and incentive programs, students can positively engage with their peers, teachers and the environment to learn about sustainability, biodiversity and the value of recycling.
